

Stylish & Refined

RAINWATER STORAGE

Steel rainwater storage tanks for your home. The Home Tank is a modern designed, yet practical zincalume rainwater harvesting tank that creates a constant water supply. Conserving and recycling rainwater is now much easier for the discerning homeowner to help manage water with flair.

WHY CHOOSE A STEEL RAINWATER TANK

The modern steel rainwater harvesting tank has unique features, with some major benefits over tanks built with alternative materials:

- ✓ The strength of the steel tanks ensure that they won't deteriorate over time under the harsh South African sun, as other materials do. Additional corrosion protection from a long life polymer coating on the inside of the tank walls and base prevents the growth of algae and bacteria.
- ✓ It can easily hold the large forces generated by tonnes of water without stretching or bulging.
- ✓ Many customers agree that a steel tank option is much more aesthetically pleasing than the polyethylene tank options, and this is why it's the choice of tank for many architects when designing a water harvesting system.
- ✓ The difference between steel and poly/plastic rainwater tanks is that a steel rainwater tank is 100% UV-proof, ensuring that steel rainwater tanks will not degrade in sunlight. Plastic or polyethylene rainwater tanks are affected by ultra violet light and can break down over time, losing both their strength and colour.

DID YOU KNOW?

Normal garden hosing can use up to 1 000 litres per hour of stored rainwater.

CHOOSE THE CAPACITY AND COLOUR OF YOUR RAINWATER HARVESTING TANK

► Round tank dimensions

1,5 m³ (1 500 ℓt)
0,9m diameter x 2,2m height

60 m³ (60 000 ℓt)
5,15 m diameter x 2,93 m height

► Slimline tank dimensions

2 m³ (2 000 ℓt)
1,8 m length
0,90 m width x 1,54 m height

7 m³ (7 000 ℓt)
3,3 m length
1,15 m width x 2,2 m height

The Home Tank is available in 14 exciting colours, as well as the original galvanised look, allowing homeowners complete freedom of expression at the same time helping homeowners manage their water with flair and elegance.

COLOUR COATED RANGE

Fish Eagle White

Aloe Green

Azure Blue

Kalahari Red

White Lion

Traffic Green

Dove Grey

Buffalo Brown

Umhlanga Wave

Dark Dolphin

Gemsbok Sand

Kingfisher Blue

Charcoal Grey

KEY FEATURES

- ✓ Save money on water bills by using your own water source
- ✓ 100% UV protection against the sun to protect drinking water against algae build-up or dirt
- ✓ Maximum capacities for the space you have available at home for maximum water accumulation
- ✓ Unique profiled 0,8 mm zincalume steel with a firm shape and mechanical strength
- ✓ Lifespan of 20 years or longer
- ✓ Corrosion is greatly reduced by the polymer coating between the tank wall and the stored water
- ✓ Aesthetically pleasing and modern look for architectural designs
- ✓ Install as a complete rainwater harvesting system to improve water quality with almost no maintenance
- ✓ Cost-effective, quick and easy installation as a DIY
